Background

Dr Joseph Thorley RPBio is a Senior Computational Biologist with Poisson Consulting Ltd who specializes in Bayesian analysis of fish and wildlife populations. As well as teaching courses on Understanding Statistics and Decision Making for Natural Resource Managers he maintains over 14 R packages on CRAN.

Education

2000 PhD in Theoretical Phylogenetics
1994 BA in Biological Sciences

Bristol University
Oxford University

Career

2017	Senior Computational Biologist	Poisson Consulting
2007	Fish Population Biologist	Poisson Consulting
2005	Fisheries Biologist	Independent
2002	Fisheries Biologist	Scottish Exec.

Recent Projects

Harmer and Grave Creek Westslope Cutthroat Trout (2020 - ongoing)

Study design, data analysis and contribution to Evaluation of Cause to estimate influence of environmental variables on population dynamics.

Bathurst and Blue Nose East Barren-Ground Caribou Herds (2018 - ongoing)

Analysis of fecundity, breeding cow abundance, cow collar, fall bull cow, fall calf cow and spring calf cow ratio data complete with standard errors using an integrated stage-based state-space population model to estimate survival and population growth rate.

Lower Columbia River Fish Indexing (2008 - ongoing)

Study design and data analysis for CLBMON-45 to estimate abundance, growth, survival and body condition of Whitefish, Rainbow Trout, and Walleye.

Lardeau and Lower Duncan River Juvenile Rainbow Trout Stock Recruitment (2008 - ongoing)

Study design, field work and data analysis for project to estimate Gerrard Rainbow Trout stock-recruitment.

Lower Columbia River Rainbow Trout Spawning (2009 - ongoing)

Study design, data analysis and report writing for CLBMON-46 to estimate the influence of dam operations on Rainbow Trout spawning, abundance, egg dewatering and survival.

Quesnel Lake Telemetry and Mark Recapture (2014 - ongoing)

Study design and data analysis for project to estimate natural and fishing mortality for large Bull Trout, Lake Trout and Rainbow Trout.
